

Drive away pesty woodpeckers

BirdXPeller PRO WP

Programmable woodpecker expeller

Sonic repeller uses distress calls to create a “danger zone” that frightens woodpeckers away for good.

- **Species-Specific and Programmable.** Actual woodpecker sounds! Choose any or all of 8 sounds, including flicker and downy woodpeckers, yellow-bellied sapsuckers, and four predators to give the birds even more of a sense of danger. Then choose volume, time off periods and random play. These programming options make it virtually impossible for birds to get used to a pattern.
- **Harmless.** BirdXPeller PRO uses natural sounds to chase away the birds, but it doesn't harm them.
- **Heavy-duty.** Sturdy plastic – powerful directional speaker in front, convenient controls on the back.
- **Easy Operation.** 110vAC electricity or 12vDC battery.
