G80 ConfigureGate®, 29 ½" high, 3-section (each 24") set. For isolation of irregular space or area. Additional sections extend length to accommodate area to isolate, and adjust at 10° increments to form layout needed, from rectangular to oblique. Available in White.	G80-8 Extra section adds 8" to ConfigureGate layout G80-24 Extra section adds 2' to ConfigureGate layout	Same as above; ConfigureGate is designed same as Hearthgate and may be used where White is desired.
PD10 PlayDen™, 29 ½" high, 6 sided (each 24") enclosure ideal for a durable, freestanding, functional and versatile play area. Available in White.	G80-24 Adds 24". Use multiples of 2 to retain symmetry of PlayDen	Designed to form a complete free-standing enclosure

NOTE: Wood Screws are provided with all wall-mounted gates for presumed installation into wood framework. Special surfaces such as brick, concrete, drywall, or plaster will require different fasteners to achieve a secure installation; a hardware professional should be consulted. KidCo offers the Model K10 installation kit which includes a sideboard and an assortment of fasteners for various installations. Use one kit per gate side as dictated by the installation needs.
